

**Management System For a Fish  
Shipping Company**

Jingyuan Lu

September 2015

**Dissertation submitted in partial fulfilment for the degree of  
Master of Science in Computing for Financial Markets  
Computing Science and Mathematics  
University of Stirling**

## **Abstract**

With the advent of the Internet Age, both enterprises and individuals are trying to find an energy-efficient way of working and living, building network platform has become a trend. The use of the Internet to achieve the sharing of online information, eliminating the need for a large number of human and material resources in the past, in order to provide a platform to improve the efficiency and level of work. This dissertation designs a fresh fish weekly shipment system which according to the requirements of the company. The development tools of the system uses MyEclipse, collocation Oracle Database as the background database. In this dissertation, first, I will introduce the development tools that I used in this project and then brief describe the basic principle of the system, and talking about why using these techniques. The development of the program using Java and JSP technology to achieve the functions of the foreground and background, from the requirement analysis, the outline design, detailed design, and the realization of encoding to expound the system and the development process. And through screenshots of the system interface, data tables, etc., in order to reflect the author's design ideas. Then I'll analyses the technical difficulties of the system test operation and system development. Finally, I want to talk about some financial aspects of the project.

Keywords: Myeclipse, Oracle database, Jsp

## Attestation

I understand the nature of plagiarism, and I am aware of the University's policy on this.

I certify that this dissertation reports original work by me during my University project except for the following (*adjust according to the circumstances*):

- The picture in Section 2 was taken from <https://www.graze.com/uk>.
- The introduction of DAO in Section 2 was taken from <http://baike.baidu.com/view/160596.htm>
- The introduction of java feature in Section 5.2.1 was taken from <http://baike.baidu.com/subview/29/12654100.htm>
- The introduction of JSP profile in Section 5.2.2 was taken from <http://baike.baidu.com/subview/3387/16963334.htm?fr=aladdin>
- The introduction of Oracle database profile in section 5.2.3 was taken from <http://baike.baidu.com/view/1685727.htm>
- The code discussed in figure 19. was taken from <http://bbs.csdn.net/topics/70056351>
- The code discussed in figure 20. was refer to <http://deific.iteye.com/blog/1172107>
