# Construction of Employee Engagement Survey Component

Martin Hofhanzl · MSc. in Software Engineering

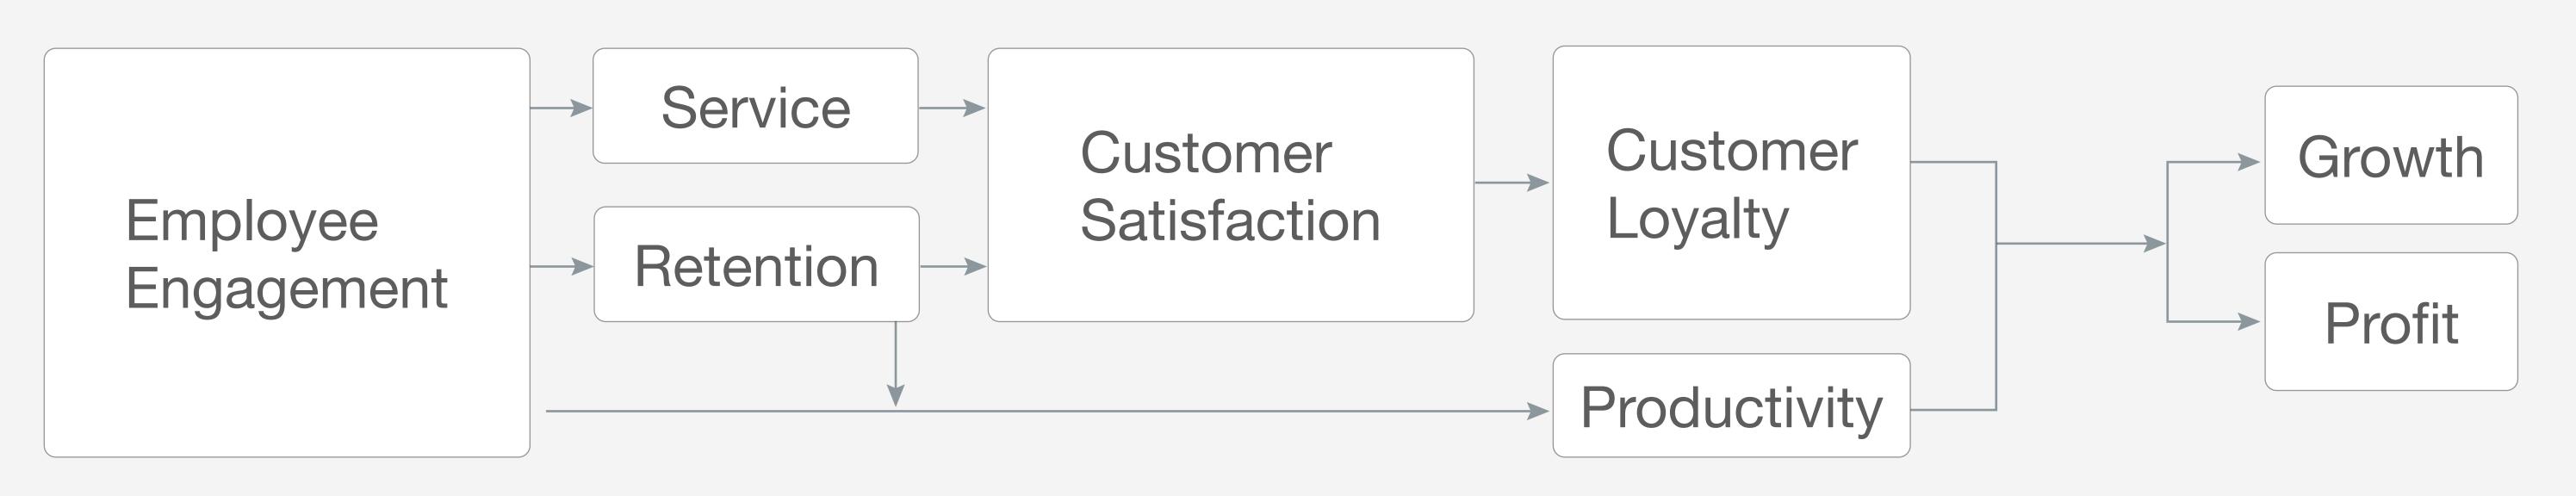

#### Motivation

Employee surveys help employers to measure and understand their employees' attitude, feedback, motivation, and satisfaction.

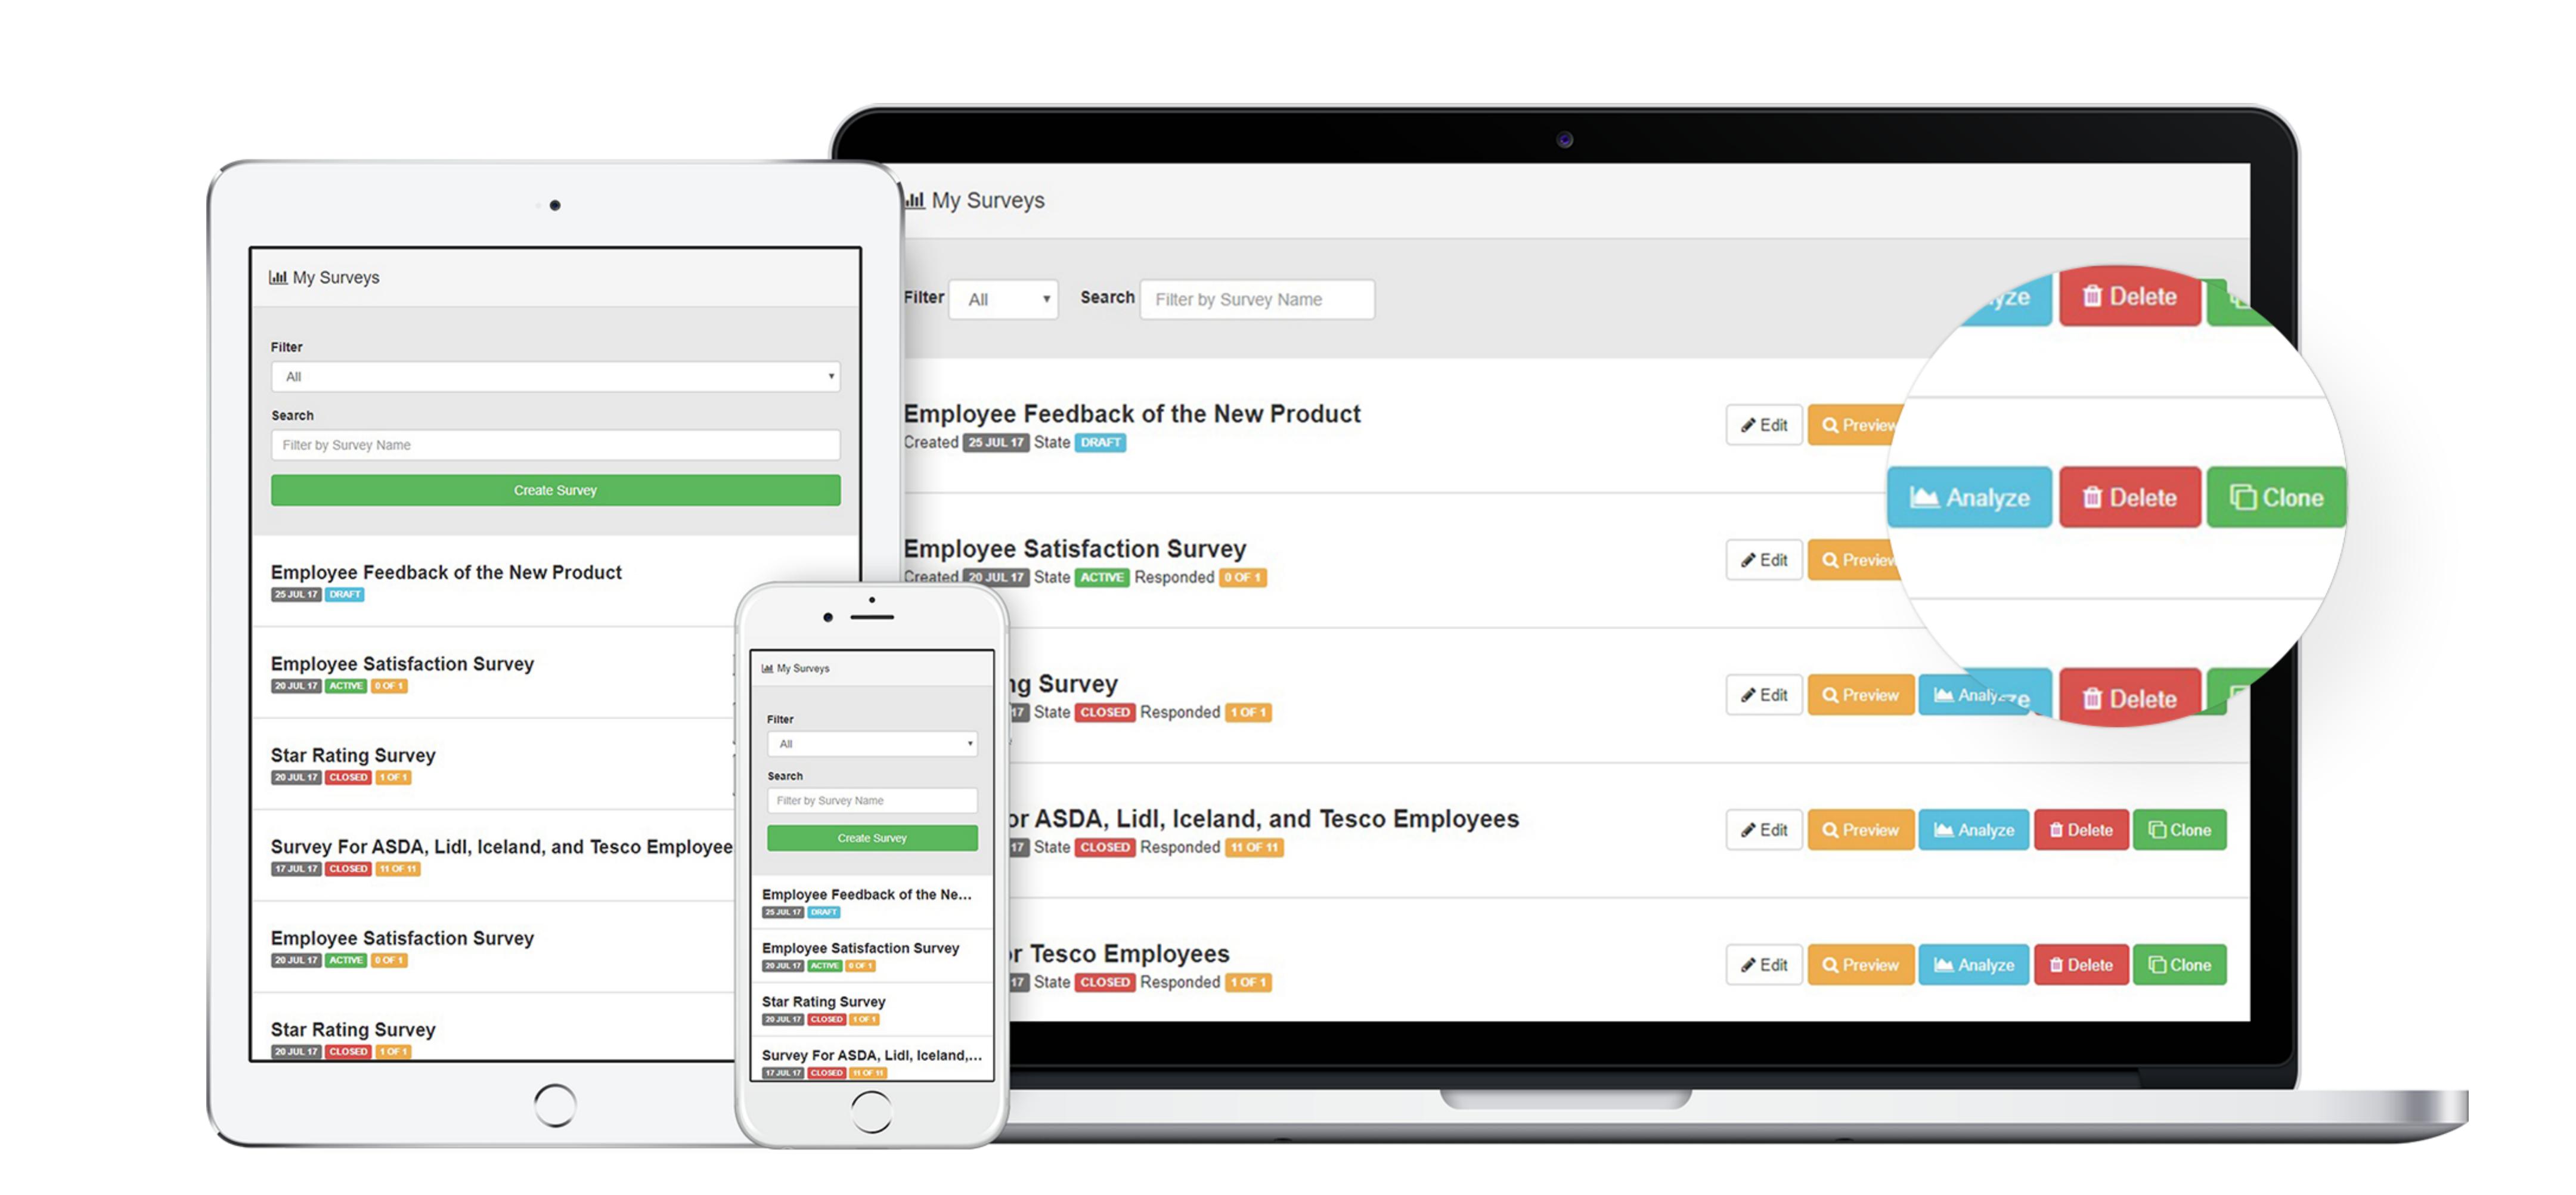

Businesses need to concentrate on employee engagement to develop workers who can drive innovation and propel their organisations forward.

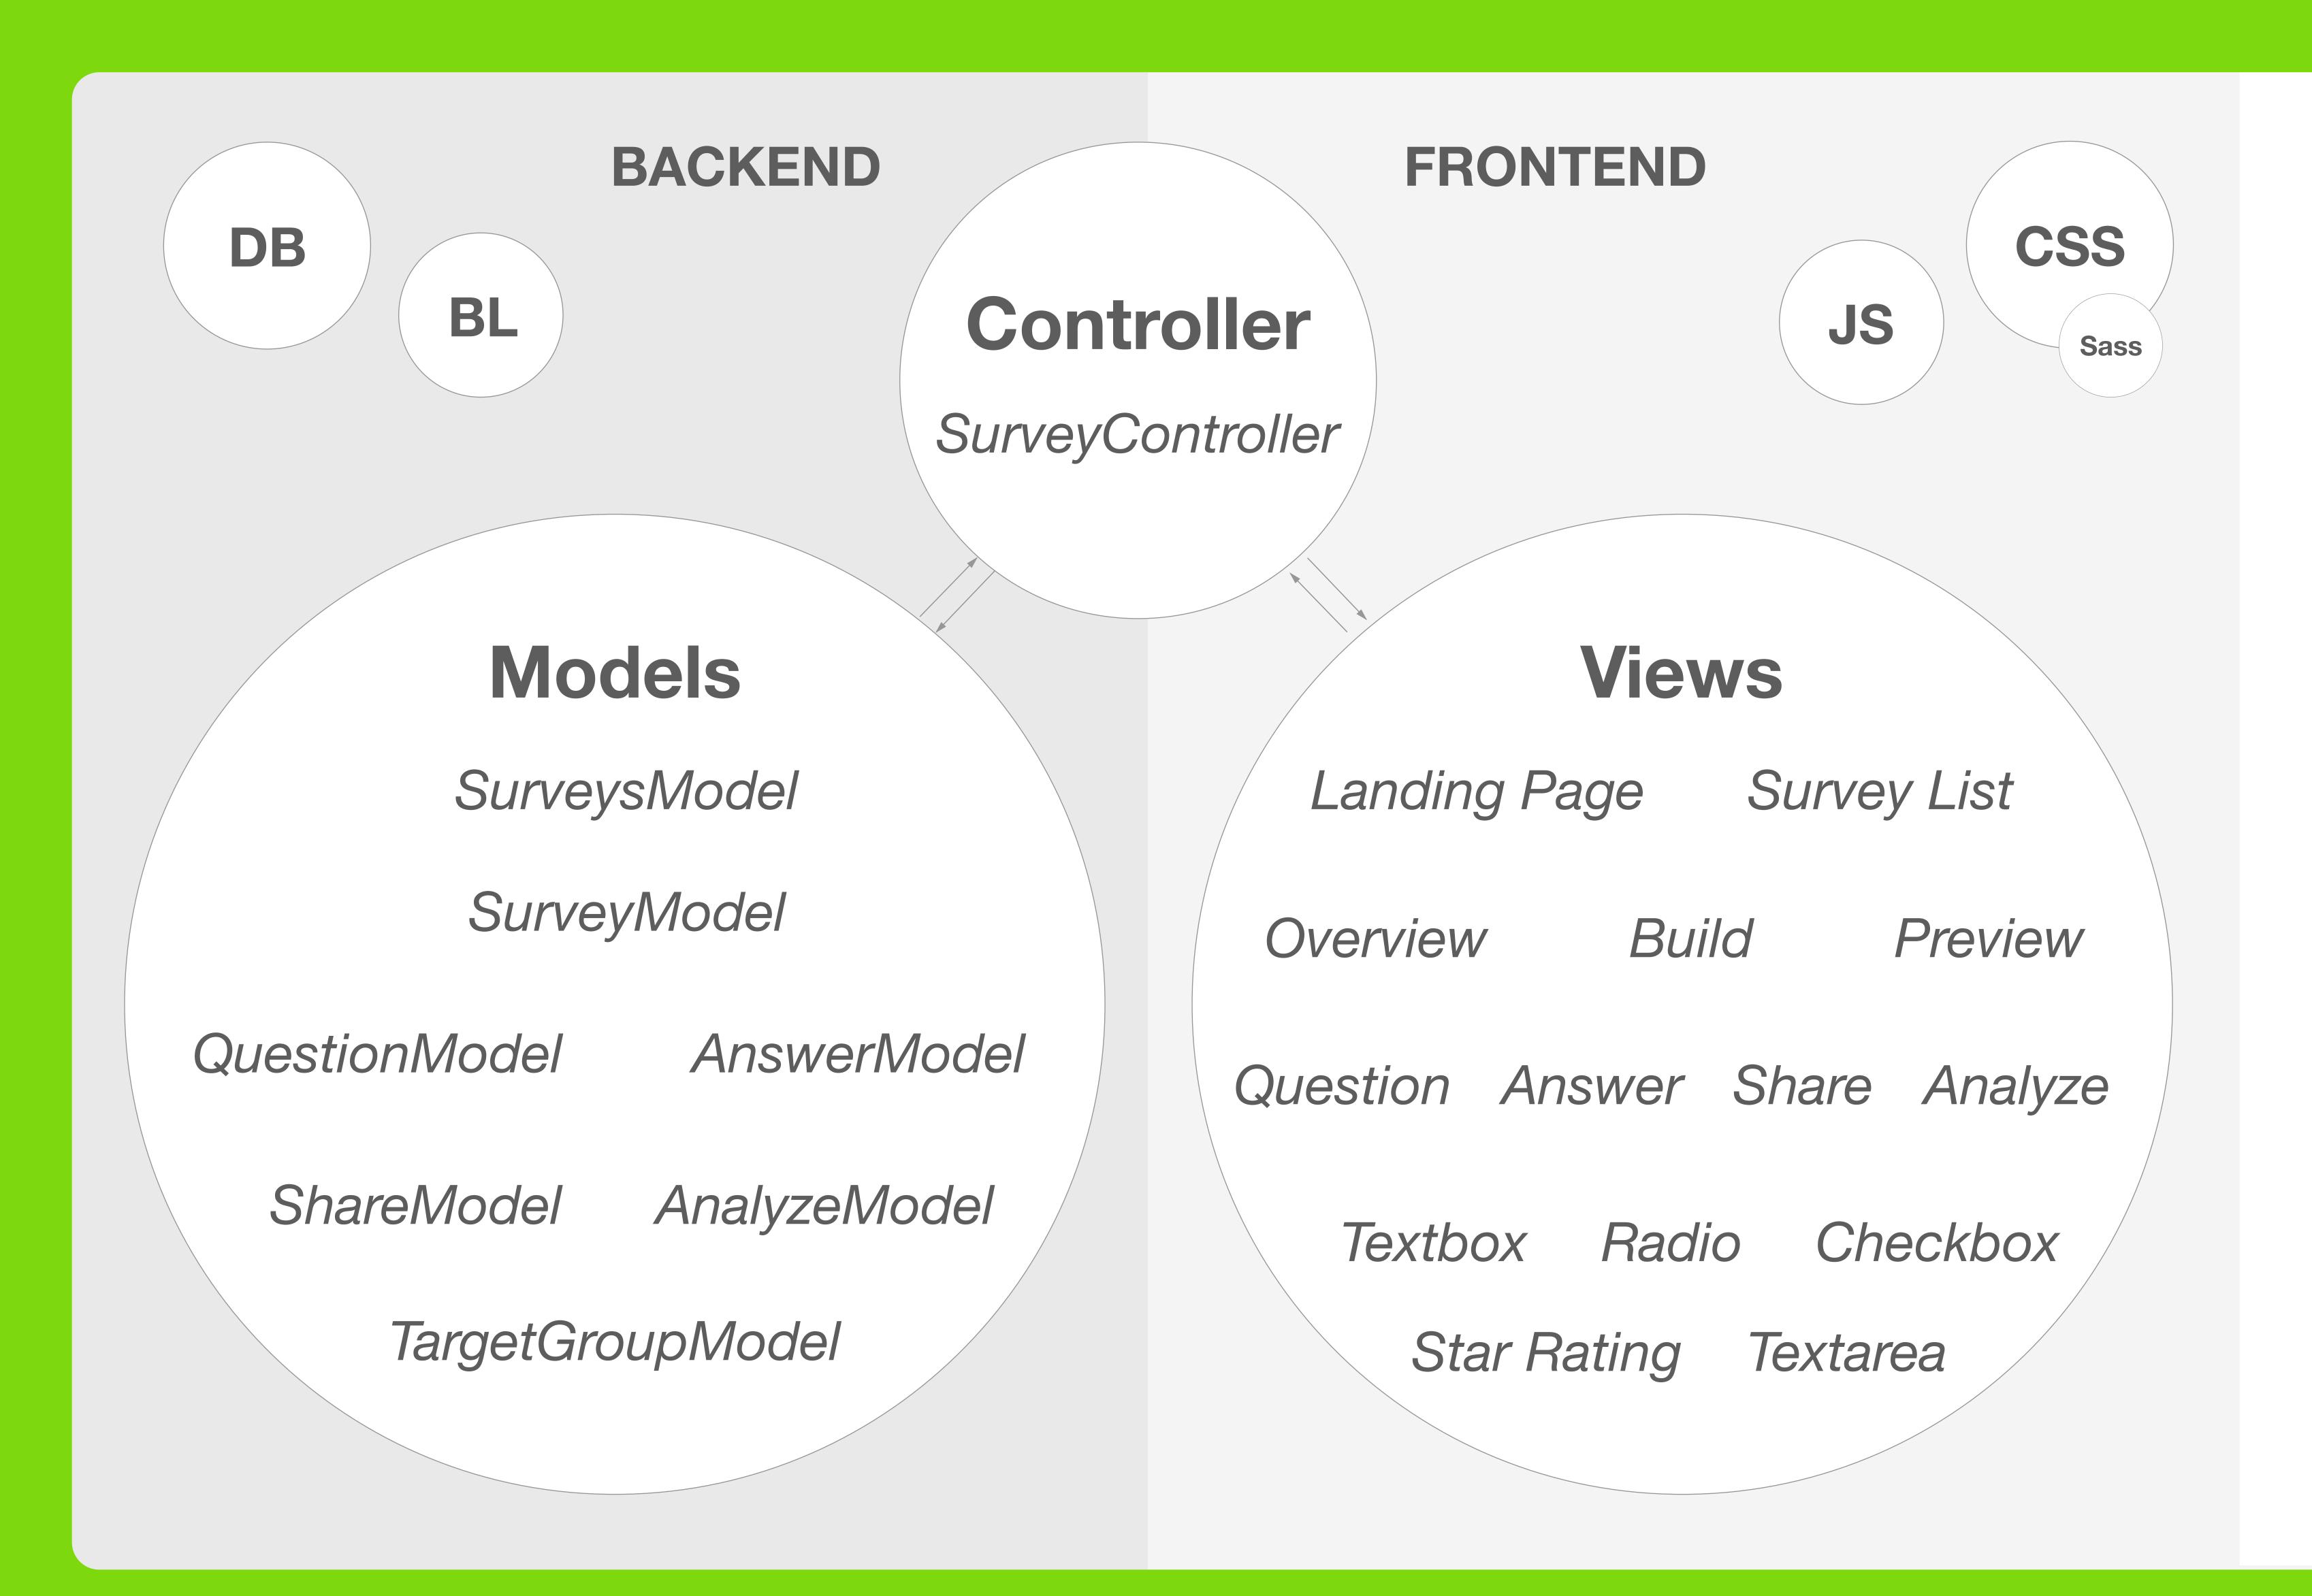

Research shows that satisfied, motivated employees will create higher customer satisfaction and in turn positively influence organisational performance, and regular checks of employee satisfaction and engagement are critical in both improving performance and in retaining employees.

## Key Features

- Mobile Responsive
- User-friendly Interface
- Survey Analysis
- Simple Survey Builder
- Target Group Selection
- Survey Copy
- Five Question Types
- Single Text
- Multiple Choice (Single Answer)
- Multiple Choice (Multiple Answers)
- ★ Star Rating
- Essay

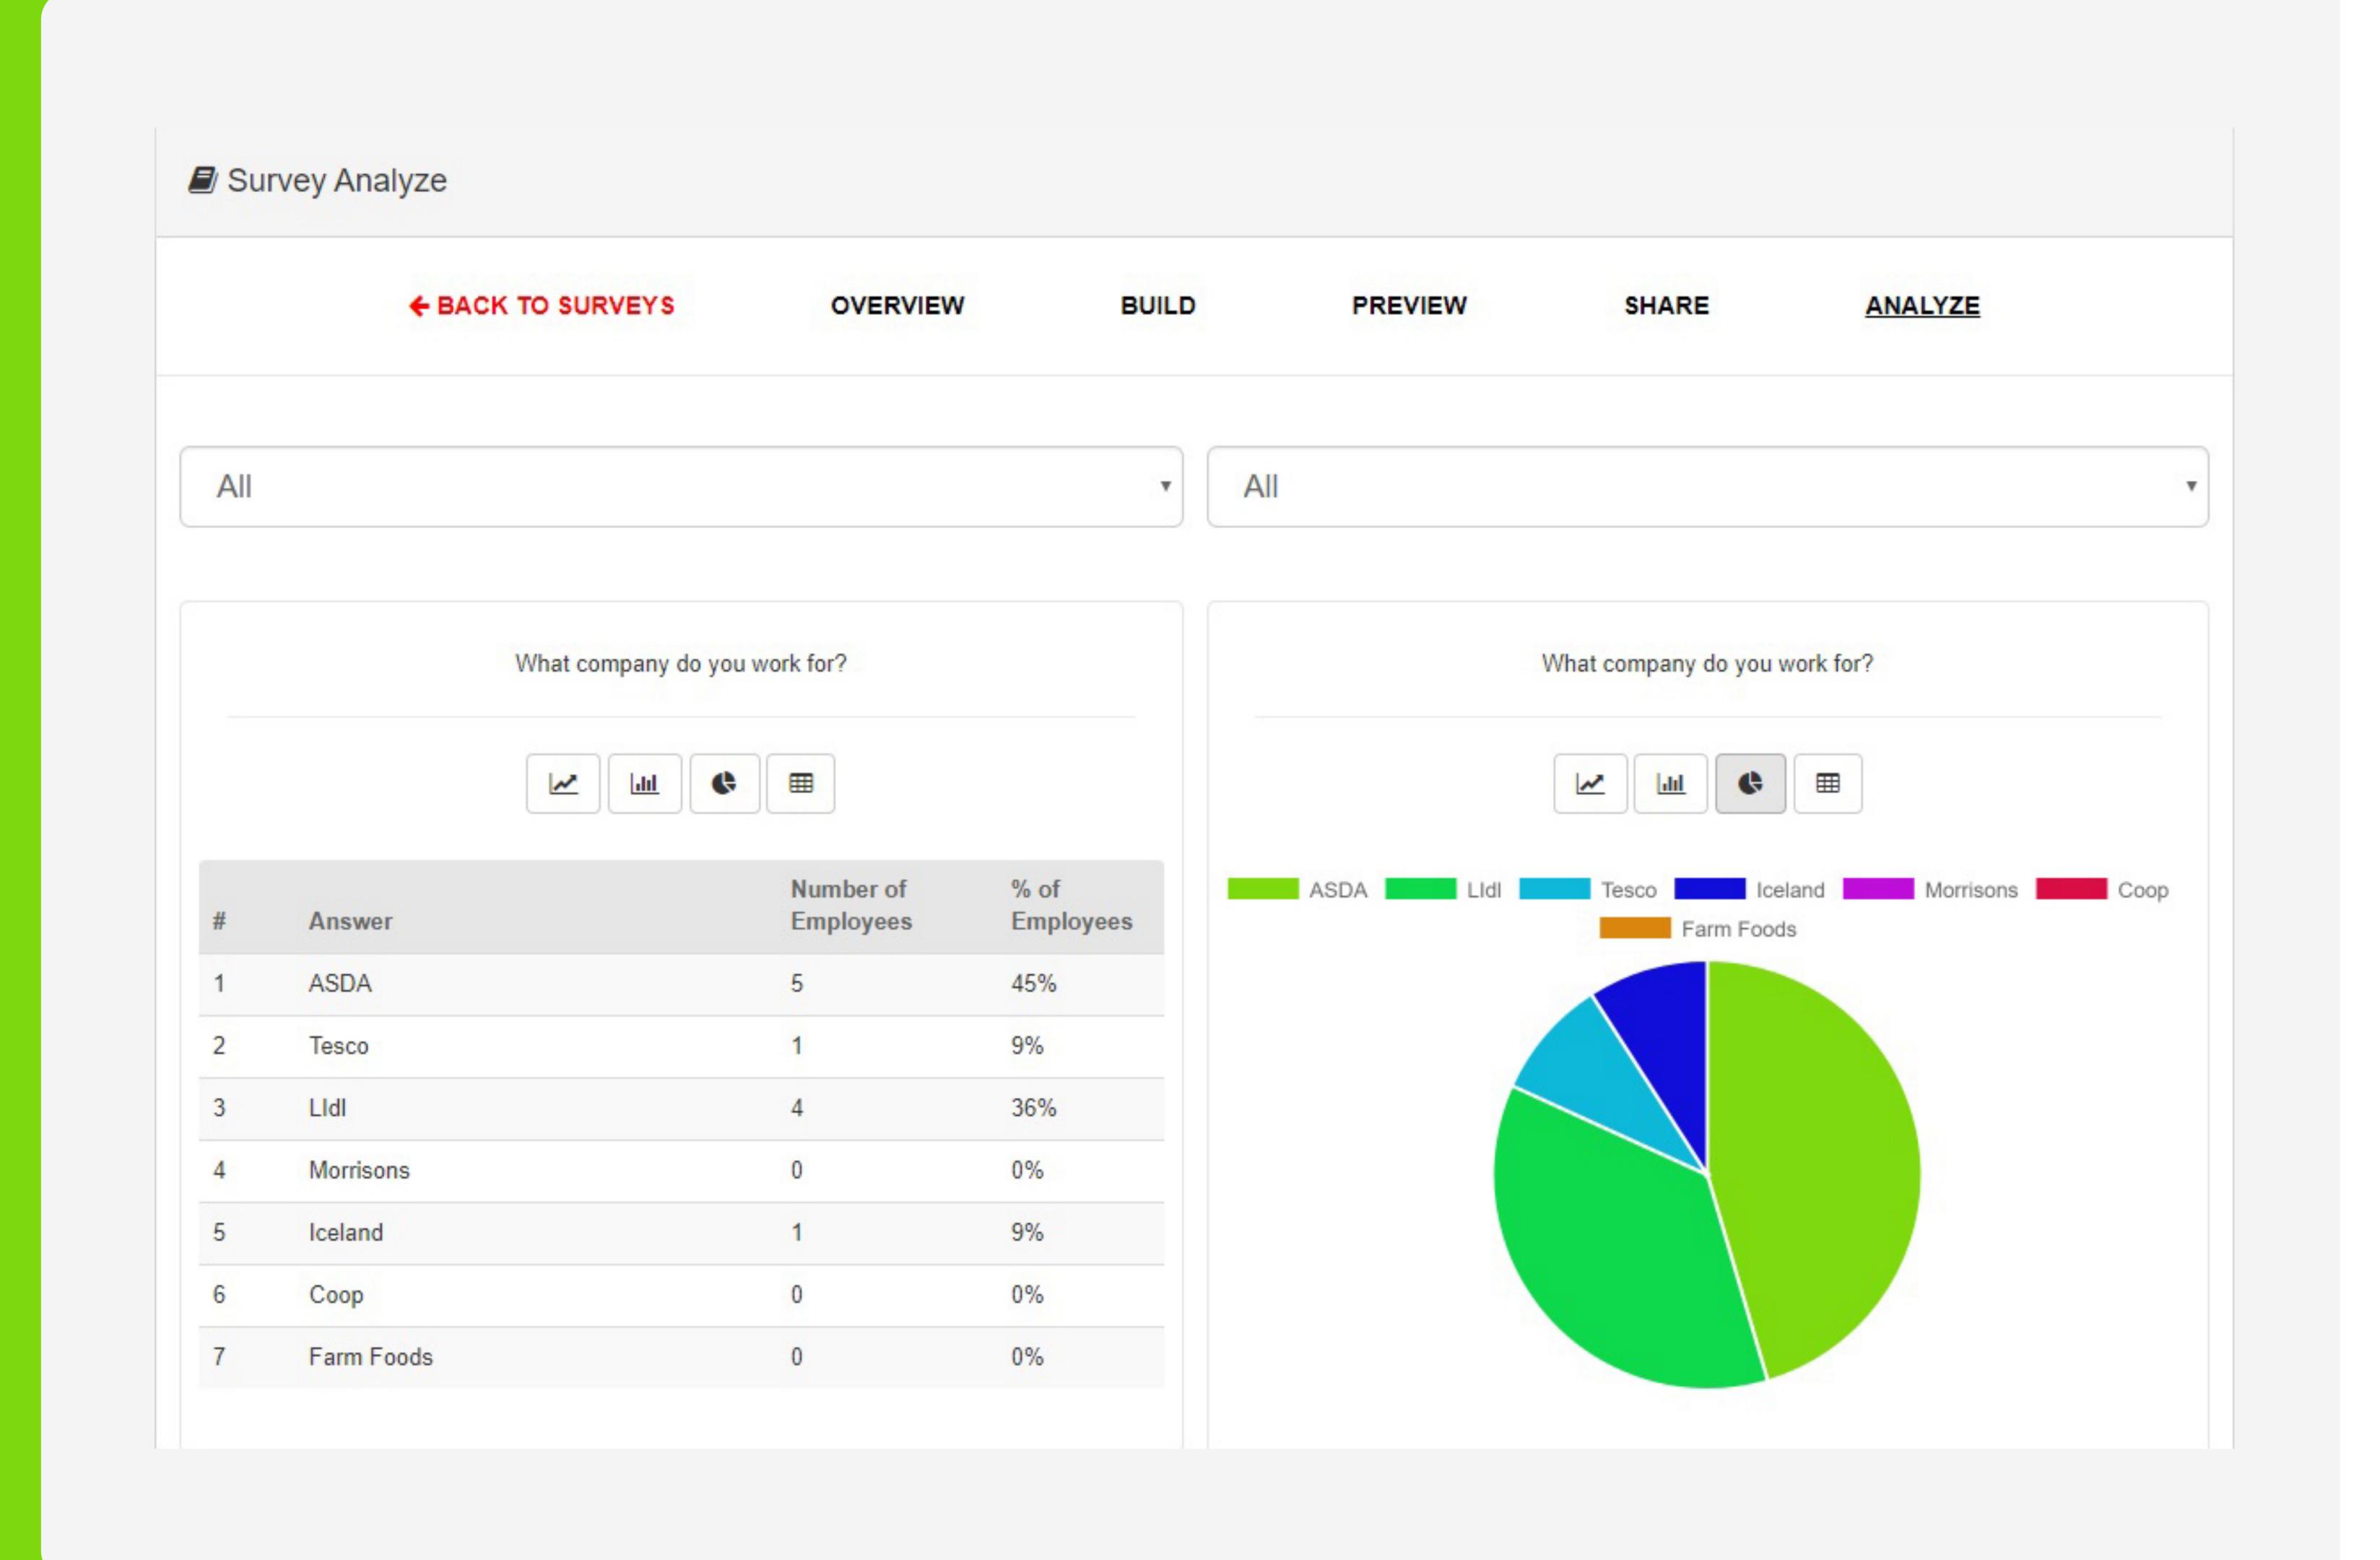

### Structure

#### ASP.NET MVC (C#)

- Models
- Controllers
- Views
- MS SQL (Entity Framework)
- HTML, CSS (Sass)
- Bootstrap
- jQuery
- AJAX

# Analysis

One of the most important things of surveys is to be able to analyze results. Interpreting the data with integrated analysis tool is easy and accessible anytime. Two-column layout allows to compare two different groups of employee's responses.
